OPEN SPACE

What is Open Space?

Ali specializes in Open Space conferences and we will be following this format for the Rec Director Summit. What is open space?

- 1) Open Space is designed to mimic the natural way people come together and begin to build networks and share ideas.
- 2) It accesses the knowledge and wisdom found in any group of people and encourages the contribution of any and all “experts” in the room.
- 3) There is no pre-set agenda. All that is known is the start and end times and what the general theme might be.
- 4) Participants themselves identify the issues and topics that are important to them, that they feel passionate about and interested in.
- 5) Small discussion groups evolve and participants can move from group to group whenever they feel that they are no longer learning or contributing, or even when they feel more interested in another topic.
